**INTERNATIONAL RAILWAY TRANSIT TARIFF  
(MTT)**

**PART I**

**GENERAL PROVISIONS**

The following entities are Parties to this Tariff:

Azerbaijan Railways Closed Joint Stock Company (AZ),

Belarusian Railway (BC),

Georgian Railway Joint Stock Company (GR),

Railway of the Republic of Kazakhstan National Company “Kazakstan Temir Zholy” Joint Stock Company (KZH),

Kyrgyz Railway National Company “Kyrgyz Temir Zholu” State Enterprise (KRG),

“Latvijas dzelzceļš” State Joint Stock Company (LDZ),

Lithuanian Railways “Lietuvos geležinkeliai” Joint Stock Company (LTG),

Railway of Moldova State Enterprise (CFM),

Ulan-Bator Railway Joint Stock Company (UBZD)<sup>1</sup>,

Ministry of Transport of the Russian Federation (Mintrans Rossii),

Tajik Railway “Rohi Ohani Tojikiston” State Unitary Enterprise (TDZ),

Turkmen Railways Türkmen demirýollary Agency owned by the Agency of Transport and Communications under the Cabinet of Ministers of Turkmenistan (TRK),

“O'zbekiston temir yo'llari” Joint Stock Company (UTI),

Ministry of Communities, Territories and Infrastructure Development of Ukraine (Mininfrastruktury Ukrainy),

Czech Railways Joint Stock Company (CD),

Estonian Railways “Eesti Raudtee” Joint Stock Company (EVR).

---

<sup>1</sup> In rail transport operations involving Mongolia, this Tariff applies only to carriage of loaded and empty large-capacity containers.

## Section I

# TARIFF APPLICABILITY, PUBLICATION, LANGUAGE, AND CURRENCY

### § 1. Applicability of the Tariff

1. This Tariff shall apply to freight consignments transited on railways of the Republic of Azerbaijan, Republic of Belarus, Georgia, the Republic of Kazakhstan, Kyrgyz Republic, Republic of Latvia, Republic of Moldova, Mongolia<sup>2</sup>, the Russian Federation, the Republic of Tajikistan, the Turkmenistan, Republic of Uzbekistan, Ukraine, the Czech Republic, and Republic of Estonia on the terms and conditions set forth in the Agreement on International Goods Transport by Rail (SMGS), Uniform Rules concerning the Contract for International Carriage of Goods by Rail (CIM), or another transport law, save carriage of goods to/from the Socialist Republic of Vietnam, People's Republic of China, People's Democratic Republic of Korea, Mongolia<sup>2</sup> that involves transiting railways of countries that also apply the Uniform Transit Tariff (ETT).

2. This Tariff shall also apply to carriage of goods through borderline stations, port stations, and stations of transloading to/from road, air, water, or pipeline transport, which stations are listed in the Tables of Transit Distances of Section I, Part VI of this Tariff.

### § 2. Publication of the Tariff

1. Notifications about this Tariff's coming into effect, as well as about any modifications of or additions to this Tariff, shall be made public through the following official publications or official websites of the Parties to this Tariff:

- for the Azerbaijan Railways (AZ), the newspaper "Azerbaijan Demiryolchusu";
- for the Belarusian Railway (BC), the official website [www.rw.by](http://www.rw.by);
- for the Georgian Railway (GR), the official website [www.railway.ge](http://www.railway.ge);
- for the Railway of the Republic of Kazakhstan (KZH), the official websites [www.railways.kz](http://www.railways.kz) and [www.ktzh-gp.kz](http://www.ktzh-gp.kz);
- for the Latvian Railway (LDZ), the official website [www.ldz.lv](http://www.ldz.lv);
- for the Lithuanian Railways (LTG), the official website [www.litrail.lt](http://www.litrail.lt);
- for the Railway of the Republic of Moldova (CFM), the official website [www.railway.md](http://www.railway.md);
- for the Ulan-Bator Railway (UBZD), "Teevriin medeeler";
- for the Russian Railways (RZD), "Transport Rossii" and the official website [www.rzd.ru](http://www.rzd.ru);
- for the Tajik Railway (TDZ), the newspaper "Naqliyot";

---

<sup>2</sup> This exception does not apply to carriage of loaded or empty large-capacity containers to/from Mongolia, where the MTT tariff is used.

- for the Turkmen Railways (TRK), the official website [www.railway.gov.tm](http://www.railway.gov.tm);
- for the Uzbekistan Railways (UTI), the official website [www.railway.uz](http://www.railway.uz);
- for the Railways of Ukraine (UZ), the official website [www.uz.gov.ua](http://www.uz.gov.ua);
- for the Czech Railways (CD), “Přepravní a tarifní věstník” and the official website [www.cdargo.cz](http://www.cdargo.cz);
- for Estonian Railway (EVR), the official website [www.operail.com](http://www.operail.com).

2. Any modifications of or additions to this Tariff shall take effect as from the date indicated in the publication, but no earlier than 15 days after the date of publication.

### **§ 3. Language of the Tariff**

1. This Tariff has been made in the Russian language. In any countries where this Tariff is applied, it may be published in the official languages of such countries.

2. In the event of any discrepancies in the interpretation of the Tariff by its Parties, such discrepancies shall be resolved based on the text in the Russian language.

### **§ 4. Currency of the Tariff**

The Swiss franc shall be the currency of the Tariff.

Any carriage charges calculated in accordance with this Tariff shall be converted into the currency of payment in compliance with the national law of the country where the carriage charges are paid.

## **Section II**

### **BASIC RULES FOR THE CALCULATION AND COLLECTION OF CARRIAGE CHARGES**

#### **§ 5. Procedure for the calculation of carriage charges**

1. Carriage charges (including freight, fares for the carriage of an attendant, road train driver, road vehicle driver, extra charges and other payments accrued in the period between the conclusion of a contract of carriage and the delivery of the goods to the consignee, including charges related to reloading of goods or bogie exchange) for carriage on transit railways shall be calculated at the rates specified in this Tariff that are effective:

- on the date of contract of carriage indicated in the date stamp of the contractual carrier at the station of departure – for goods the carriage of which is documented with a consignment note for direct international carriage by rail for the entire route;
- on the date indicated in the date stamp of the carrier at the station where the legal regime of the contract of carriage changes – for goods the carriage

of which involves re-issuing of the railway consignment note to make transition from one international transport law regime to another;

- on the date of contract of carriage indicated in the date stamp of the contractual carrier at the station of departure at the station of transloading of goods from air, road, water, or pipeline transport to rail transport;

- on the date of contract of carriage indicated in the date stamp of the contractual carrier at the station of departure – for goods whose carriage involves transloading from rail transport to air, road, water, or pipeline transport;

- on the date on which a wagon is detected to be loaded in excess of its load capacity or acceptable static load on the rails from the axle – for the purposes of calculating carriage charges on the excess mass of the goods loaded in an individual wagon.

2. Carriage charges shall be calculated separately for each consignment by each Party to this Tariff.

3. A consignment shall be defined as:

- goods loaded in a wagon (permanently coupled wagon set);
- goods loaded in an intermodal transport unit (ITU), in a road vehicle (RV), or an empty ITU or RV;

- load on own wheels (railway rolling stock, railway cranes, railway track maintenance and construction vehicles).

4. Carriage charges for carriage under a single consignment note of goods in two or more wagons (other than permanently coupled wagon sets); or containers carried under a Wagon List or Container List; as well as a load on own wheels that consists of more than one unit shall be calculated separately for each wagon or container as if it were an individual consignment.

5. Parties to this Tariff may apply special tariff terms and conditions to carriage by container trains.

6. Carriage charges shall be calculated based on:

- Harmonized Nomenclature of Goods (GNG, published separately);
- Tables of Transit Distances (Section I, Part VI of this Tariff);
- extra charges and other payments (Section III, Part VI of this Tariff);
- information contained in the consignment note.

The following data is factored in in the calculation of carriage charges:

- terms and conditions of carriage for a particular consignment (wagon, ITU, RV, load on own wheels);

- mass of the consignment;

- tariff distance;

- category of container;

- other conditions set forth in this Tariff.

## **§ 6. Description of goods**

1. The consignor shall give a description to all goods other than dangerous goods in the consignment note in conformance with the Harmonized Nomenclature of Goods (the GNG), and indicate their GNG codes.

2. Dangerous goods shall be given descriptions in the consignment note in conformance with Annex 2 to SMGS “Rules for Carriage of Dangerous Goods”, and the goods’ code under the GNG shall be indicated.

### **§ 7. Tariff distance**

Carriage charges shall be calculated at the rate of that section in the tables of tariff rates set forth in Section II, Part VI of this Tariff, which contains the tariff distance to which the consignment in question is to be carried.

### **§ 8. Mass of a consignment**

1. Unless this Tariff specifies otherwise, the mass of a consignment shall include the mass of the load, mass of the packaging, and the mass of loading tackle that has not been included in the mass of the wagon; when a consignment is transported in an ITU (other than a container) or in an RV, its mass shall also include the mass of the road train, road vehicle, trailer, semitrailer, or swap body.

2. For the purposes of calculating the carriage charge, the mass of a consignment (other than a container) indicated in the consignment note shall be rounded to the full ton (calculated mass), with values of 500 kg or more rounded to 1 ton and values less than 500 kg disregarded.

For the purposes of calculating extra charges and other payments, the mass of a consignment shall be rounded to full 100 kg, with values short of 100 kg rounded to full 100 kg.

### **§ 9. Rounding of carriage charges**

For the purposes of calculating carriage charges, each amount and/or charge shall be rounded to a full Swiss centime. Half a centime or more shall be rounded to a full centime, less than half a centime shall be disregarded.

### **§ 10. Collection of carriage charges**

Carriage charge calculated under this Tariff shall be collected separately by each carrier involved in the carriage from a payer with whom the carrier has a contract for the payment of carriage charges.

All extra charges, payments, and costs accrued at stations of transloading to other modes of transport shall be collected by the carrier from a payer with whom the carrier has a contract for the payment of carriage charges.

**PART II****CALCULATION OF CARRIAGE CHARGES FOR CARRIAGE  
IN A WAGON OR ON OWN WHEELS****Section I****GENERAL TARIFF RULES****§ 11. Charge for carriage of goods in a wagon**

1. Charge for carriage of goods in a wagon shall be calculated by multiplying the corresponding tariff rate for the consignment's weight category (Section II, Part VI of this Tariff) by the number of tons in the calculated mass of the consignment (point 2, paragraph 8 of this Tariff), but not below the mass of the weight category specified in Table 1:

Table 1

<b>Calculated mass of a consignment</b>	<b>Weight category</b>
up to 8 tons	5 t
from 9 t to 12 t	10 t
from 13 t to 16 t	15 t
from 17 t to 23 t	20 t
24 t or more	25 t

2. If goods that are part of a single consignment are reloaded at a gauge break station from a single wagon of a track gauge into two or more wagons of a different track gauge, the carriage charge after the reloading shall be calculated for goods reloaded into each wagon as individual consignments.

In such a case, the tariff rate and the calculated mass is determined in the same procedure (point 1 of this paragraph) separately for each wagon so loaded as a result of the reloading based on the mass of goods in each wagon.

In the case when on the way of the goods sent to a single consignee at a single station of destination, the goods are reloaded from two or more wagons into a single wagon as two or more consignments, respectively (parts of two or more consignments that did not fit into a wagon containing the primary part of the consignment), the tariff rate shall be determined in accordance with the normal procedure (point 1 of this paragraph) based on the aggregate mass of all the consignments (parts of consignments) reloaded into the wagon. In such a case, the carriage charge for each of the consignments (parts of consignments) shall be calculated as follows:

- if the sum of the calculated masses of all consignments (parts of consignments) in a wagon is equal to the weight category by which the tariff rate is determined, or exceeds the weight category, then the carriage charge shall be calculated by multiplying the tariff rate by the calculated mass of each consignment (part of a consignment);

- if the sum of the calculated masses of all consignments (parts of consignments) in a wagon is less than the weight category by which the tariff rate is determined, then the carriage charge shall be calculated by multiplying the tariff rate by the weight category and distributing the resulting charge between the consignments (parts of consignments) in proportion to their masses.

3. If two or more wagons of the same track gauge are needed on the way for reloading of a consignment for reasons that are outside of the carrier's control, then the carriage charges for the goods loaded into each of the wagons shall be calculated as carriage charges for separate consignments.

The carriage charge for carriage of goods in each wagon loaded as a result of a reloading shall be calculated in accordance with the procedure set forth in point 2 of this paragraph.

4. Carriage charge for carrying goods on a transporter wagon that is part of a freight train shall be calculated by the rules of point 1 of this paragraph for the calculated mass of the consignment, but no less than for 5 tons per each axle of the transporter wagon.

If a load is carried by a transporter wagon with the number of axles greater than 8 using a circuitous rather than the shortest route, then the carriage charge shall be calculated for the actual distance covered, provided that the carriage by the circuitous route was agreed with the consignor and the circuitous route is specified in the consignment note.

## **§ 12. Charge for carriage on own wheels**

1. The charge for carriage of a load on own wheels (such as railway rolling stock, railway cranes, track maintenance and construction machines) shall be calculated by the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon, with the rates multiplied by a coefficient of 0.50. Each rolling stock unit shall be deemed a separate consignment, with the own mass of such a rolling stock unit taken as the mass of the consignment.

2. For the purposes of calculating the carriage charge for carriage on rolling stock units of bogies or wheelsets, spare parts, parts or units of equipment of rolling stock or needed on the way, such items are deemed to be parts of the rolling stock units, and their mass is added to the mass of the rolling stock units.

3. The charge for carriage of rolling stock units loaded with goods other than those described in point 2 of this paragraph, shall be calculated separately:

- for the rolling stock units, in accordance with point 1 of this paragraph;
- for goods loaded on the rolling stock units, for the mass of the goods in accordance with the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon at tariff rates for the weight category corresponding to the sum of the mass of the rolling stock units and the mass of the goods loaded thereon.

**Section II****SPECIAL TARIFF RULES****§ 13. Carriage charge for oversized loads**

1. The charge for carriage (including carriage on a transporter wagon) of a load that exceeds the loading gauges of transit railways (other than those described in point 2 of this paragraph) shall be calculated by the carrier according to the General Rules of this Tariff applicable to carriage of goods in a wagon (point 1 of paragraph 11) using the following coefficients depending on the degree of the oversize:

- not more than 2.00 for an oversized load with 1-4 bottom, 1-4 lateral, and 1-3 top oversize degrees;

- not more than 3.00 for an oversized load of oversize degree 5.

A specific value of the carriage charge markup coefficient shall be determined as part of negotiating the terms and conditions of carriage.

2. The charge for carriage of a 6<sup>th</sup> degree oversized load, or an extra oversized load on a flatbed, semi-wagon, or transporter wagon that is part of a freight train shall be determined for each specific case as part of negotiating the terms and conditions of carriage under the national law of the country where the carriage charges are paid.

3. An extra charge for reloading a load item that exceeds the loading gauge shall be set by the carrier that performs the reloading for each specific case as part of negotiating the terms and conditions of carriage (point 1.7, Section III “Extra Charges and Other Payments,” Part VI of this Tariff).

4. If no carriage or reloading charge was set as part of negotiating the terms and conditions of carriage, then the General Tariff Rules of this Tariff concerning carriage in a wagon shall be applied.

5. If an oversized load is carried on transit railways using a circuitous rather than the shortest route, then the carriage charge shall be calculated for the actual distance covered, provided that the circuitous route was agreed with the consignor and the circuitous route is described in the consignment note.

6. The provisions of points 1, 3, 4, and 5 of this paragraph shall also apply if carriage on transit 1,435-mm gauge railways is performed in a 1,520-mm gauge 1-VM wagon bearing the sign “MS-1” at the request of the consignor and with consent of any carriers involved in the carriage, and the carriage involves no reloading.

7. For each railway, the charge for carriage of an oversized load on a transporter wagon that is part of a freight train shall be calculated according to the rules set forth in point 4, paragraph 11 of this Tariff and provisions of points 1-5 of this paragraph.

8. The provisions of points 1-5 of this paragraph shall not apply to carriage of an empty 1,520-mm gauge wagon that is not owned by the carrier.

#### **§ 14. Charge for carriage of an extra-long load**

1. The charge for carriage under a single consignment note of an extra-long load loaded on two or more wagons shall be calculated for each wagon separately in accordance with the General Tariff Rules of this Tariff applicable to carriage of a load in a wagon. The total mass of the consignment shall be divided equally by the number of wagons.

If the consignment note specifies the mass of the load for each wagon, then the charge for each wagon shall be calculated based on such masses.

2. If an extra-long load is loaded on two flatbed wagons that are a permanently coupled unit with a single number, then the carriage charge shall be calculated as the charge for carriage in a single wagon.

#### **§ 15. Charge for carriage of dangerous goods**

The charge for carriage of dangerous goods that under Annex 2 to SMGS “Rules for Carriage of Dangerous Goods” fall into Classes: 1 “Explosive substances and articles”, 5.2 “Organic peroxides (UN Nos. 3101-3110)”, 6.2 “Infectious substances”, 7 “Radioactive substances,” and goods indicated in the Table of Part V of this Tariff shall be calculated according to the General Tariff Rules of this Tariff for the carriage of goods in a wagon, with the rates multiplied by a coefficient of 2.00.

#### **§ 16. Charge for carriage of automobiles on a specialized car transporter wagon**

The charge for carriage of automobiles in a specialized car transporter wagon shall be calculated according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon.

#### **§ 17. Carriage charge for perishable goods**

1. The charge for carriage of perishable goods in isothermal rolling stock units shall be calculated according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon.

2. No charges shall be assessed for carriage of a diesel generator wagon as part of a refrigerated section owned by the carrier, for carriage of such a refrigerated section’s service crew, and for carriage of an empty refrigerated section owned by the carrier (after unloading or to the place of loading).

3. The charges for carriage of a diesel generator wagon which is part of either loaded or empty refrigerated section and not owned by the carrier shall be calculated at a tariff rate of 0.12 Swiss francs per axle-kilometer.

No separate charge shall be assessed for the carriage of a service crew in such a diesel generator wagon.

4. The charge for carriage of an empty wagon as part of a loaded refrigerated section shall be calculated at a tariff rate of 0.10 Swiss francs per axle-kilometer irrespective of the refrigerated section's ownership.

### **§ 18. Carriage charge for a dead human body**

The charge for carriage in a wagon of a coffin containing a dead human body, or a cremation urn with human ashes shall be calculated according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon.

No charge shall accrue for carriage in the same wagon as the coffin containing a dead human body of items with an aggregate mass of up to 500 kg related to the dead person.

### **§ 19. Charge for carriage of loads in a wagon not owned by the carrier, and for carriage of an empty wagon**

1. The charge for carriage of goods in a wagon not owned by the carrier shall be calculated according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon and multiplied by the coefficient 0.85.

2. The charge for carriage of an empty wagon (after unloading or to the place of loading) referred to in point 1 of this paragraph shall be calculated at a tariff rate of 0.10 Swiss francs per one axle-kilometer.

The provisions of this point shall not apply to carriage of an empty wagon not owned by the carrier on LDZ, CD, or EVR.

3. The charge for carriage of an empty wagon on LDZ, CD, and EVR shall be calculated in accordance with Tables 6 and 7 of Section II, Part VI of this Tariff.

### **§ 20. Charge for carriage of loads using a dedicated locomotive**

No provisions of this Tariff shall apply to carriage of loads using a dedicated locomotive.

The carriage charge shall be determined in each specific case as part of negotiating the terms and conditions of carriage.

### **§ 21. Carriage charge for household items**

Carriage charge for household items (moving to a new home, GNG item 9901) carried in a wagon shall be calculated according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon.

GNG item 9901 "Household items carried in moving to a new home" includes household items serving personal, family, household, and other needs that are not related to any business activity: home furniture and utensils, personal items either new or used (baby carriages, various prostheses, bicycles, motorbikes, scooters, refrigerators, washing machines, upright pianos, grand

pianos, furniture, books, home music centers and home theaters, and other home equipment), the consignor and consignee of which is a natural person.

## **§ 22. Charge for carriage of a buffer wagon**

1. The charge for carriage of an empty wagon used as a buffer wagon required by the national law of a transit railway, or an empty wagon carrying a clearance outline frame, shall be calculated as follows:

- for a wagon owned by the carrier, at a tariff rate of 0.35 Swiss francs per axle-kilometer;

- for a wagon not owned by the carrier, at a tariff rate of 0.30 Swiss francs per axle-kilometer.

2. The charge for the carriage of a wagon used as a buffer wagon shall be determined for the tariff distance used to calculate the charge for the carriage of goods that require buffer wagons.

3. If a loaded wagon is used as a buffer wagon, the carriage charge shall be calculated according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon. In such a case no charge described in point 1 of this paragraph shall be additionally made for the carriage of the wagon used as a buffer.

If a loaded wagon is used to carry a clearance outline frame, the carriage charge shall be calculated according to General Tariff Rules of this Tariff applicable to loads charged by mass, the mass to include the mass of the load and the mass of the clearance outline frame.

## **§ 23. Charge for carriage of loading tackle**

1. For the purposes of this Tariff, loading tackle shall be construed as devices designed to position, fasten, and secure a load during carriage.

Loading tackle shall include fastening devices (braces, straps, ties (including multi-link ones), links, racks, boards and timbers, supports, pads, rests, spurs, frames, cassettes, pyramids, lodgments, turnstiles, ropes, steel cables, pallets, and other fastenings), as well as devices intended to protect the goods from damage or exposure to the elements (including tarpaulins).

2. The consignor must specify in the consignment note the mass of loading tackle not included in the mass of the wagon separately from the mass of the goods.

3. In cases where goods are carried with loading tackle other than tarpaulins, the carriage charge shall be calculated according to the rules of this Tariff for the carriage of goods for the mass of the consignment which includes the mass of the goods and the mass of the loading tackle that have not been included in the mass of the wagon.

If the consignment note has an entry specifying the quantity of loading tackle but not its mass, then the mass of the loading tackle shall be assumed to be 10 tons.

No charge shall be collected for carriage of tarpaulins used to secure the carried goods if the mass of the tarpaulins is specified in the consignment note separately from the mass of the goods.

4. Loading tackle owned by the carrier is carried back free of carriage charges. If such carriage is performed in a freight wagon not owned by the carrier, a charge for carriage of a wagon is collected at the tariff rate of 0.10 Swiss francs per axle-kilometer.

5. The charge for return carriage of loading tackle not owned by the carrier shall be calculated according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon for the calculated mass of the loading tackle but not less than for 10 tons.

6. The charge for carriage of an empty freight wagon not owned by the carrier, which wagon has non-removable equipment whose mass is not included in the mass of the wagon, shall be calculate at the tariff rate of 0.12 Swiss francs per axle-kilometer.

#### **§ 24. Charge for carriage of a load attendant, road train driver, road vehicle driver**

1. The charge for carriage of each attendant of the goods, road train driver, or road vehicle driver shall be calculated at a tariff rate of 12.00 Swiss francs per each complete or incomplete 100 km.

2. If an attendant, road train driver, or road vehicle driver travels in a separate rolling stock unit that does not carry goods, an additional charge on top of the charge for the carriage of an attendant, road train driver, or road vehicle driver shall be collected as calculated according to the following tariff rates:

- 0.23 Swiss francs per axle-kilometer for a freight wagon owned by the carrier;

- 0.20 Swiss francs per axle-kilometer for a freight wagon not owned by the carrier;

- 0.30 Swiss francs per axle-kilometer for a passenger coach not owned by the carrier;

- 0.35 Swiss francs per axle-kilometer for a passenger coach owned by the carrier.

3. Carriage of an attendant in a separate rolling stock unit on CD shall be charged according to point 3, paragraph 19 of this Tariff.

#### **§ 25. Charge for carriage of goods of different descriptions in a wagon**

1. If goods of different descriptions that are allowed to be carried together are carried under a single consignment note, the carriage charge shall be calculated for the aggregate mass of the consignment according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon.

2. If oversized or dangerous goods are carried as part of the consignment, then the charge for carriage of such goods shall be determined in accordance with the Special Tariff Rules of this Tariff.

### **§ 26. Charge for carriage of animals**

The charge for carriage of animals shall be calculated according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon.

No charge shall be collected for carriage of fodder or loading tackle in the same wagon as the animals.

### **§ 27. Charge for carriage of bulk loads**

1. The charge for carriage in wagons of bulk loads listed below shall be calculated applying a coefficient of 0.90 according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon:

- |                            |   |
|----------------------------|---|
| 2505                       | Natural sands of all kinds, colored or uncolored, except metalliferous sands under Chapter 26;  |
| 2508                       | Other clays (excluding expansive clays under item 6806), andalusite, kyanite, sillimanite, calcinated or non-calcinated clays; mullite; chamotte or dinas earths;   |
| 2517,<br>except<br>2517 10 | Pebble, gravel, crushed rock typically used as concrete fillers, highway or railway ballast or other ballast; pebble or boulders or flint stone, thermally treated or untreated; macadam of cinder slag, dross or similar industrial waste that includes or does not include any materials listed in the first part of the item; bituminous macadam; stone granules, chips or powder under item 2515 or 2516, thermally treated or untreated; |
| 2601                       | Iron ore or concentrates, including roast pyrite;   |
| 2602                       | Manganese ore or concentrates, including ferruginous manganese ore or concentrates with manganese content of 20 mass percent or more in calculated as dry product;  |
| 2606                       | Aluminum ore or concentrates;   |
| 2701                       | Hard coal; briquettes, pellets, or similar types of solid fuel made from hard coal;   |
| 2702                       | Lignite, or brown coal, agglomerated or non-agglomerated, other than jet;   |
| 2703                       | Peat (including peat chips), agglomerated or non-agglomerated;  |
| 2704                       | Coke or semi-coke of hard coal, lignite, or peat, agglomerated or non-agglomerated; retort carbon;  |
| 2708                       | Pitch or pitch coke obtained from coal tar or other mineral tars;   |
| 2713                       | Petroleum coke, petroleum bitumen, or other residual material from refining crude oil or petroleum products obtained from bituminous rocks;   |

- 3102 Mineral or chemical fertilizers, nitrogenous;
- 3103 Mineral or chemical fertilizers, phosphoric;
- 3104 Mineral or chemical fertilizers, potassic;
- 3105 20 Mineral or chemical fertilizers containing three nutrients: nitrogen, phosphorus, and potassium;
- 3105 51 Other mineral or chemical fertilizers containing nitrates and phosphates;
- 3105 59 Other mineral or chemical fertilizers containing two nutrients: nitrogen and phosphorus;
- 3105 60 Other mineral or chemical fertilizers containing two nutrients: phosphorus and potassium;
- 4401 Fuel wood in the form of timbers, logs, branches, bundles of sticks, or similar; wood chips or shavings; saw dust and wood waste and scrap, non-agglomerated or agglomerated in the form of blocks, briquettes, granules, or similar forms;
- 4403 Raw wood, barked or unbarked, with or without sapwood, trimmed or untrimmed;
- 4404 Cooperage wood; split logs; piles, stakes, or sharpened but not longitudinally sawed wooden poles; roughly trimmed but not turned or otherwise machined that are used for making walking sticks, tool handles, or similar items; rotary cut or similarly treated wood.

2. The markdown specified in point 1 of this paragraph shall apply to consignments of 20 and 25 tons weight categories.

### **§ 28. Charge for carriage with shortened delivery time**

If agreed between the parties involved in the transport operation, a shortened delivery time may be applied. An agreed shortened delivery time shall be attested by the consignor with an entry "Shortened delivery time" in box 15 "Description of goods" of the SMGS consignment note. In such a case, the charge for carriage of the goods in a wagon, ITU or RV shall be calculated according to the General Tariff Rules of this Tariff:

- as part of a freight train, with a coefficient of 1.50;
- as part of a passenger train, with a coefficient of 2.00;
- as part of a container train, with a coefficient of 1.00.

**PART III****CALCULATION OF CHARGES FOR CARRIAGE OF A LOADED OR EMPTY CONTAINER****§ 29. Charge for carriage of a loaded or empty container**

1. The charge for carriage of a loaded or empty general-purpose large-capacity container shall be calculated separately for each container according to the tariff rates of Tables 2-4 in Section II, Part VI of this Tariff.

The charge for carriage of a loaded general-purpose large-capacity 20-foot container with the maximum (stenciled) gross mass of 30 tons or more and actual gross mass of over 24 tons shall be calculated at tariff rates of Tables 2-4 in Section II, Part VI of this Tariff for a loaded general-purpose 20-foot container multiplied by a coefficient of 1.20.

The charge for the carriage of a loaded or empty tank wagon (tank container) shall be calculated according to tariff rates of Tables 2-4 of Section II, Part VI of this Tariff applicable to carriage of a loaded or empty general-purpose container of the corresponding category multiplied by a coefficient of 1.40.

The charge for the carriage of a loaded or empty refrigerated container shall be calculated according to tariff rates of Tables 2-4 of Section II, Part VI of this Tariff applicable to carriage of a loaded or empty general-purpose container of the corresponding category multiplied by a coefficient of 1.35.

If a loaded or empty refrigerated container is carried together with a diesel generator wagon that is not owned by the carrier, an additional charge of 0.12 Swiss francs per axle-kilometer shall be made for carriage of the diesel generator wagon.

The charge for carriage of a diesel generator container (group type code SN, detailed type codes S4 and SJ under ISO 6346:1995) shall be calculated according to tariff rates of Tables 2-4 of Section II, Part VI of this Tariff applicable to a loaded general-purpose container of the corresponding category by multiplying the rate by a coefficient of 1.35.

2. The charge for carriage of a loaded or empty general-purpose medium-capacity container with a volume of 5 cubic meters (maximum permitted gross mass of 3 tons) or 11 cubic meters (maximum permitted gross mass of 5 tons) shall be calculated separately for each container according to tariff rates of Table 5, Section II, Part VI of this Tariff.

3. The charge for carriage of a loaded or empty container in a wagon not owned by the carrier shall be calculated according to points 1 and 2 of this paragraph applying a coefficient of 0.85.

4. The charge for carriage of specialized containers of other types whose parameters match those of general-purpose containers shall be calculated according to the Tariff Rules of this Tariff applicable to carriage of general-purpose containers.

### **§ 30. Charge for carriage of postal items**

International postal items (IPI) shall include parcels and written correspondence that are objects of postal exchange under regulations of the Universal Postal Union (UPU) and are packaged and documented in conformance with the requirements of UPU regulations.

Conveyance of international postal items (IPI) shall be documented as required by UPU regulations.

International postal items (IPI) shall include letters (regular, registered, with a declared value); postcards (regular, registered); letter packets and special M bags (regular, registered); small packages (registered); parcels (regular, with declared value); international express mail items.

1. The charge for carriage of postal items in a container (GNG code 99910000) shall be calculated according to the Tariff Rules of this Tariff applicable to carriage of goods in a container.

2. The charge for carriage of postal items in a freight wagon, in a passenger wagon, or in a combination mail-and-baggage wagon that is part of a freight train (GNG code 99910000) shall be calculated according to the General Rules of this Tariff applicable to carriage of goods in a wagon (point 1 of paragraph 11).

## **PART IV**

### **CALCULATION OF CHARGES FOR CARRIAGE OF A LOADED OR EMPTY ITU (OTHER THAN A CONTAINER) OR A ROAD VEHICLE**

#### **§ 31. Charge for carriage of a loaded or empty ITU (other than a container) or a road vehicle**

The charge for carriage of a loaded or empty ITU (other than a container) or a RV, irrespective of the degree of its oversize, shall be calculated according to the General Tariff Rules of this Tariff applicable to carriage of goods in a wagon, but not less than for 10 tons.

**PART V****LIST OF DANGEROUS GOODS**

A list of dangerous goods, excluding goods of hazard classes 1, 5.2, 6.2, and 7, transportation of which is governed by the provisions of paragraph 15 of this Tariff (Section II), is provided in the Table of this Tariff:

Table

<b>Description of dangerous goods, including technical name</b>	<b>UN No.</b>	<b>Description of dangerous goods under Annex 2 to SMGS</b>	<b>Danger class</b>
<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>
NITRIC OXIDE AND DINITROGEN TETROXIDE MIXTURE (NITRIC OXIDE AND NITROGEN DIOXIDE MIXTURE) *	1975	NITRIC OXIDE AND DINITROGEN TETROXIDE MIXTURE (NITRIC OXIDE AND NITROGEN DIOXIDE MIXTURE) *	2
Aquanite*	2927	TOXIC LIQUID, CORROSIVE, ORGANIC, N.O.S.	6.1
ACROLEIN, STABILIZED **	1092	ACROLEIN, STABILIZED **	6.1
ALLYLAMINE **	2334	ALLYLAMINE **	6.1
AMMONIUM PERCHLORATE *	1442	AMMONIUM PERCHLORATE *	5.1
BARIUM CYANIDE *	1565	BARIUM CYANIDE *	6.1
Vinyl**	3161	LIQUEFIED GAS, FLAMMABLE, N.O.S.	2

TCDD	75	Turkish State Railways

## 2. Notes to tables of transit distances

1. Closed for transloading of liquid bulk cargos.
2. Transshipment of goods to/from Iran.
3. Transshipment of goods to/from Turkey.
4. Transshipment of goods to/from China.
5. Transshipment of goods to/from Afghanistan.
6. Open only for goods carried in a wagon.
7. Closed for consignments requiring phytosanitary inspection.
8. Closed to consignments of animals.
9. Closed to imports to the Czech Republic and exports from the Czech Republic that are subject to phytopathological control.
10. Closed to carriage of goods that are subject to veterinary control (other than animal feed, medicated feed derived from plants or minerals and containing no feed materials or animal tissues).
11. Open only to goods carried in wagons, except consignments of animals, raw materials of animal origin, and plants requiring phytopathological inspection.
12. Closed to goods carried from Yahodyn to Dorohusk in covered rolling stock units and having a mass of a single package over 1.5 tons.
13. Closed to consignment requiring phytopathological control to enter the Czech Republic or Slovak Republic.  
A phytopathological inspection of consignments carried in transit through these two countries is required to be carried out in advance of entering the countries.
14. The crossing is closed to dangerous waste materials listed in the Basel Conventions (import, export, or transit).
15. Wheelset interchange from the 1,520-mm gauge to 1,435-mm gauge is performed on both sides.
16. Goods are transloaded to the 1,520-mm gauge.
17. Closed to consignments carried to the Republic of Poland or transiting the Republic of Poland that are subject to phytopathological control.
18. Closed to goods carried in open rolling stock units and having a mass of a single package over 12.0 tons.
19. Closed to consignments that are subject to veterinary control.
20. Temporarily closed.
21. Open to transportation of containers.
22. Closed to goods carried in covered rolling stock units whose roof cannot be opened and the mass of a single package of goods exceeds 2.5 tons.
23. Closed to consignments of extra-long goods loaded on two or more wagons.
24. Transit tariffs apply to carriage of goods across land border crossings to or from the Rimkai station (LTG) that serves the Port of Klaipeda.
25. Carriage is subject to approval by LTG.
26. The crossing is open to transportation on the 1,520-mm gauge:
  - 1) with a bogie swap from 1,5200-mm to 1,435-mm at the Sędziszów

station;

2) by transloading of goods at the stations:

- Zamość Bortatycze,
- Szczepieszyn,
- Wola Baranowska,
- Gołuchów,
- Sławków.

Transloading of goods is performed by private companies and requires negotiations with a transloading company.

27. Closed to goods in packages of over 1,000 kg carried in covered rolling stock.

28. On UZ, transloading of goods from 1,520-mm gauge wagons to 1,435-mm gauge wagons is performed:

at the Yahodyn station, of goods carried in open rolling stock in bulk and/or packages of up to 12.0 tons;

at the Liuboml station, by a private company and requires negotiations with same for goods carried in covered wagons in packages of up to 2.5 tons; goods carried in open rolling stock in bulk and/or packages of up to 12.0 tons.

29. Open to transportation of 20-foot containers.

30. Bogie interchange from 1,520-mm gauge to 1,435-mm gauge and vice versa is performed at the Kovel station (UZ).

31. These transit distances apply to cases where goods are carried in 1,520-mm gauge 0-VM wagons bearing the sign MC-0.

32. Open to transportation of 20-, 30-, 40-foot containers with a maximum gross mass of a single container of 16 tons.

33. Open to transportation of oversized or extra-heavy items with a single package mass of up to 40 tons from Poland to Russia. Transloading is performed at the Chernyakhovsk station.

34. Bogie interchange from 1,520-mm gauge to 1,435-mm gauge is performed on the 1,520-mm gauge track (BC, RZD).

35. CIM consignment notes are converted into SMGS consignment notes, and vice versa.

36. Closed to transportation of goods with a single package mass of over 50 tons on open rolling stock units.

37. Bogie interchange to the other gauge is performed at the Esen station (UZ).

38. Transloading of goods to the PKP is performed by private companies and requires negotiations with a transloading company.

39. Open only to:

- consignments in block trains to Germany;
- empty wagons in block trains to the Czech Republic.

40. Open to transportation of 20-, 30-, and 40-foot containers.

41. Serves only as a tariff point for wagons carried to Poland from Austria or other countries transiting Austria.

Actual carriage is performed through Petrovice u Karviné – Zebrzydowice.

The Chałupki station may not be indicated in boxes 13 and 58 of the CIM consignment note as the customs clearance point.

42. Transloading of petroleum products or liquefied gases into 1,435-mm gauge or 1,520-mm gauge wagons is performed by specialized transloading terminals at the stations Batiovo, Strabichevo, Mukachevo, and Klyucharky (UZ).

43. Transloading of liquid bulk loads is performed by private companies and requires approval by LTG.

44. Transloading from two tank containers into a single tank wagon of 1,435-mm gauge is performed at the Klyucharky station.

45. Performs transloading of goods into 1,435-mm gauge wagons.

46. Closed to oversized consignments.

47. Bogie interchange at Mościska II station requires prior agreement.

48. Open to transloading of goods with a mass of a single package of up to 3.0 tons from covered wagons with fixed roofs carried on a route that involves transloading; requires prior agreement.

49. Open to transloading of goods from pipeline transport.

50. Transloading of goods only into open 1,435-mm or 1,520-mm gauge wagons.

51. Open to loads of coal, fertilizers, grain, liquid or solid bulk loads, in various receptacles or packages, or single-item goods requiring transloading from 1,520-mm gauge wagons into 1,435-mm gauge wagons and vice versa. Requires agreement from BC.

52. Closed to consignments destined to the Czech Republic or transited through the Czech Republic and subject to veterinary control.

53. Bogie interchange from 1,520-mm gauge to 1,435-mm gauge and vice versa is performed at the Záhony station.

54. Reserved.

55. Reserved.

56. Reserved.

57. Open to goods set forth in the Regulation concerning the International Carriage of Dangerous Goods by Rail (RID) and in Annex 2 to SMGS "Rules for transportation of dangerous goods"; requires separate agreement for each individual case.

58. Reserved.

59. Open only to carriage of coal, metals, industrial salt, construction materials, including clay and refractory materials.

60. Reserved.

61. Open only to goods listed below that are subject to veterinary control at entering Austria (imports and transit goods):

- packaged food products;

- any other products that have storage temperature requirements;

- hoofed animals: cattle, sheep, goats, pigs, wild or domesticated horses.

62. The crossing is open only to consignees located within the Bayan-Tumen segment of the railway.

63. The People's Republic of China allows entry of four-axle wagons with a maximum axle load of 15.75 tons if the wagons are to be transloaded; if bogies are changed, the maximum axle load is 16.5 tons; wagons traveling through the Dostyk border station may have an axle load of 17.5 tons.

64. Transloading takes place on the 1,520-mm gauge track on the receiving side at the station Dostyk (KZH).

65. Closed to goods with a single package mass of over 20.0 tons.

66. Open to transportation of liquid bulk loads.

67. Reserved.

68. Reserved.

69. Reserved.

70. Reserved.

71. BC's border stations Bruzgi and Brest are closed to goods with an individual package mass of over 1.5 tons carried in covered rolling stock units.

72. Closed to consignments subject to veterinary control at entry into Austria (import, transit).

73. Reserved.

74. Reserved.

75. Closed to carriage of animals into Germany (import, transit).

76. Reserved.

77. Closed to consignments subject to veterinary control at entry into Austria (import, transit), except consignments of hay or straw.

78. Open without restrictions only to consignments transiting Ukraine on the 1,435-mm gauge system under a CIM consignment note on the following segments in both directions: Halmeu – Dyakovo – Chop – Čierna nad Tisou; Halmeu – Dyakovo – Chop – Zahon; Čierna nad Tisou – Chop – Zahon.

79. Reserved.

80. Reserved.

81. Reserved.

82. Transloading and re-issue of transport documents take place at the Šeštokai station (LTG).

83. Closed to transportation of sodium carbonate, sodium nitrate, or other consignments of chemicals that are intended to be transloaded manually (consignments in bulk or in bags) to the PKP. The restriction does not apply to consignments carried on pellets, in containers, or in big bags that are intended for mechanized transloading.

84. The crossing is open to transportation of waste materials that are admissible into international traffic. Entry into Poland (import, transit) of consignments of dangerous waste materials listed in the Basel Convention is subject to prior approval. Requests for approval must be submitted to:

Główny Inspektorat Ochrony Środowiska,  
ul. Wawelska 52/54,  
PL-00-922 Warszawa.

This note applies to the border crossings listed below:

0823	Międzylesie	(PKP)	-	Lichkov	(CD)
0822	Mieroszów	(PKP)	-	Meziměstí	(CD)
0826	Zebrzydowice	(PKP)	-	Petrovice u Karviné	(CD)
0830	Braniewo	(PKP)	-	Mamonovo	(RZD)
0840	Trakiski	(PKP)	-	Mockava	(LTG)
0847	Terespol	(PKP)	-	Brest	(BC)
0962	Medyka	(PKP)	-	Mościska II	(UZ).

85. Reserved.

86. Reserved.

87. Reserved.

88. Closed to consignments subject to veterinary control prior to entry into Germany (import, transit).

89. Prior permission need to be requested before importing into Germany or transiting through Germany of consignments of material or substances of Class 7, sheets 5-13 of the Regulation concerning the International Carriage of Dangerous Goods by Rail (RID). Requests for permissions must be submitted to:

Nuclear Cargo + Service GmbH  
 Rodenbacher Chanssee 6  
 DE-63457 HANAU  
 Tel. +49 (0)6181 501-0  
 Telex: + 49 (0)6181 57 3692.

90. Closed to consignments originating from non-EU countries and subject to veterinary control in the Republic of Estonia.

**Note:** In the Tables of Transit Distances, the distances between border stations, from/to border stations to/from transshipment stations (to water, road, air, or pipeline modes of transport) are given in kilometers from and to state borders.

## Section III

## ADDITIONAL CHARGES AND OTHER PAYMENTS

Descriptions of charges and other payments	Unit of measurement	Amount in CHF
<p><b>1. Transloading charge.<sup>1</sup></b>  Transloading from wagons of a certain track gauge to wagons of a different track gauge, as well as transloading from/to a wagon to/from a road vehicle shall be charged at the following rates:</p> <p><b>1.1. Goods carried in bulk:</b>  1.1.1. In wagons of all types except covered wagons.  1.1.2. In covered wagons.</p> <p><b>1.2. Goods carried in packages.</b></p> <p><b>1.3. Goods carried in receptacles, in a packaging, or single-item goods.</b>  1.3.1. Goods in receptacles, in a packaging, or single-item goods, if the number of items is equal to or exceeds 1000.</p> <p><b>1.4. Liquid bulk goods in tank wagons (including heating).</b></p> <p><b>1.5. Loaded or empty medium-capacity container with a volume of 5 m<sup>3</sup> (maximum admissible gross mass 3 tons) or 11<sup>3</sup> (maximum admissible gross mass 5 tons).</b></p> <p><b>1.6. Large-capacity container:</b>  1.6.1. Loaded.  1.6.2. Empty.</p> <p><b>1.7. Oversized or extra-heavy goods with a weight of a single item over 60 tons; extra-long goods over 18 m; chemicals carried in special tanks.</b></p> <p><b>1.8. A loaded ITU (other than a container) or an RV.</b></p> <p><b>1.9. An empty ITU (other than a container) or an RV.</b></p> <p><b>1.10. Passenger car.</b></p>	<p>100 kg</p> <p>100 kg</p> <p>100 kg</p> <p>100 kg</p> <p>100 kg</p> <p>100 kg</p> <p>container</p> <p>container</p> <p>container</p> <p>consignment</p> <p>consignment</p> <p>per one unit</p>	<p>1,20</p> <p>1,58</p> <p>1,38</p> <p>1,55</p> <p>1,65</p> <p>1,20</p> <p>23,94</p> <p>73,98</p> <p>36,99</p> <p>as negotiated and mutually agreed</p> <p>95,74</p> <p>47,87</p> <p>20,49</p>
<p><b>2. Goods thawing charge.</b>  Thawing of goods prior to transloading.</p>	<p>100 kg</p>	<p>1,09</p>
<p><b>3. Charge for bogie exchange to a different gauge:</b>  <b>3.1. Bogie exchange:</b></p>		

Descriptions of charges and other payments	Unit of measurement	Amount in CHF
<p>3.1.1. On a loaded wagon.</p> <p>3.1.2. On an empty wagon not owned by the carrier and transported under point 2, paragraph 19 of this Tariff.</p> <p>3.1.3. On a rolling stock unit transported as a load on own wheels under paragraph 12 of this Tariff.</p> <p><b>3.2.</b> If bogie exchange involves the installation or removal of buffer gear, an additional charge is made on top of the bogie exchange charge. If buffer gear is installed or removed on end wagons of a group of wagons, then the additional charge is made for one wagon, and the amount is distributed in proportion to the number of wagons in the group and indicated in each of the consignment notes.</p>	<p>axle</p> <p>axle</p> <p>axle</p> <p>wagon</p>	<p>76,16</p> <p>76,16</p> <p>76,16</p> <p>40,26</p>
<p><b>4. Charge for declaring the value of goods.</b> The charge for declaring the value of goods shall be made irrespective of the distance and separately in favor of each carrier. Any amounts short of 100 CHF are rounded up to full CHF100.</p>	<p>CHF100 of the declared value of goods</p>	<p>1,20</p>
<p><b>5. Charge on goods that require a customs inspection.<sup>2</sup></b> To cover the carrier's costs associated with a customs inspection of carried goods, a one-time charge shall be made in favor of each carrier irrespective of any charges collected by the customs authorities:</p> <p><b>5.1.</b> Per wagon.</p> <p><b>5.2.</b> Per container.</p> <p><b>5.3.</b> If carriage is under a Container List:</p> <p>5.3.1. Goods of the same description.</p> <p>5.3.2. Goods of different descriptions.</p> <p><b>5.4.</b> Per ITU (other than a container) or an RV.</p>	<p>consignment</p> <p>consignment</p> <p>consignment</p> <p>container</p> <p>consignment</p>	<p>8,16</p> <p>8,16</p> <p>8,16</p> <p>8,16</p> <p>8,16</p>
<p><b>6. Charge for the installation of seals at a border station or a gauge break station.</b> If goods are transloaded from wagons of a certain track gauge into wagons of a different track gauge, a charge for the installation of seals shall be made at the following rates:</p> <p><b>6.1.</b> Locking and sealing devices (LSDs):</p> <p>6.1.1.</p> <p>6.1.2.</p>	<p>wagon</p> <p>container</p>	<p>25,00</p> <p>15,00</p>

Descriptions of charges and other payments	Unit of measurement	Amount in CHF
<b>6.2. Seals:</b> 6.2.1. 6.2.2.	wagon container	7,00 5,00
<b>7. Charge for the positioning and securing of goods, for providing loading tackle (irrespective of the type or load capacity of the wagon).<sup>3</sup></b>	wagon	112,61
<b>8. Charge for a delay of a wagon, container, or load on own wheels on a transit railway by causes beyond the carrier's control.<sup>4</sup></b> A charge shall be collected for a delay of a wagon, container, or load on own wheels on a transit railway:  <b>8.1.</b> For a two-axle wagon. <b>8.2.</b> For a wagon with three or more axles. <b>8.3.</b> For a transporter wagon: 8.3.1. With the number of axles up to 8, inclusive. 8.3.2. With the number of axles over 8. <b>8.4.</b> For a medium-capacity container with a volume of 5 m <sup>3</sup> (maximum admissible gross mass 3 tons). <b>8.5.</b> For a medium-capacity container with a volume of 11 m <sup>3</sup> (maximum admissible gross mass 5 tons).  <b>8.6.</b> For a container of 10 feet in length.  <b>8.7.</b> For a container with a length of over 10 feet and up to 20 feet, inclusive.  <b>8.8.</b> For a container with a length of over 20 feet.  <b>8.9.</b> For a diesel generator wagon. <b>8.10.</b> For load on own wheels.	wagon-hour wagon-hour  wagon-hour axle-hour container-hour container-hour  container-hour container-hour  container-hour wagon-hour axle-hour	2,94 4,35  7,29 1,09 0,44 0,87  1,09 2,18  4,35 7,29 1,09
<b>9. Charge for refrigerated carriage:<sup>5</sup></b> <b>9.1.</b> Charge for carrier-provided fuel used for heating a wagon, irrespective of the wagon's load capacity and the distance of carriage.	wagon	65,28

Descriptions of charges and other payments	Unit of measurement	Amount in CHF
<p><b>9.2.</b> For maintaining a constant temperature regime in refrigerated wagons or sections owned by CIS carriers and traveling on railways of the Republic of Belarus, Republic of Kazakhstan, Republic of Moldova, Russian Federation, and Ukraine, a charge shall be collected for each:</p> <p>9.2.1. Refrigerated wagon or section.</p> <p>9.2.2. Refrigerated container.</p>	<p>wagon</p> <p>container</p>	<p>as negotiated and mutually agreed</p>
<p><b>10. Charge for watering animals during carriage.</b></p>	<p>wagon</p>	<p>32,64</p>
<p><b>11. Charge for reissuing of the consignment note by the carrier due to a change in the legal regime governing the contract of carriage.</b></p>	<p>consignment note</p>	<p>8,70</p>
<p><b>12. Charge for services associated with the acceptance or handover of loaded or empty wagons, ITUs, RVs, or loads on own wheels at Ukrainian border crossings to railways of Hungary, the Republic of Poland, Slovak Republic, and Romania.<sup>6</sup></b></p>	<p>wagon/ unit of load on own wheels</p>	<p>32,07</p>

Descriptions of charges and other payments	Unit of measurement	Amount in CHF
<b>15. Charge for a locomotive's shunting services involved in the uncoupling or coupling of a wagon in the event of delay of the wagon or container on a transit railway the cause of which delay is beyond the carrier's control.<sup>9</sup></b>	each half-hour of shunting	35,00
<b>16. Charge for the use of the carrier-provided two-axle bogie for bogie exchange on a wagon not owned by the carrier.</b> <b>16.1.</b> From 1 to 15 days, inclusive.  <b>16.2.</b> Over 15 days.	bogie-day	5,0
<b>17. Other charges and payments</b> Any additional charges, payments, or costs that are not addressed in this Tariff and arise on transit railways (including border stations and stations of transloading to other modes of transport; and costs associated with the cleaning and/or disinfection of wagons after transporting animals, fowl, meat, fish, game, or foul-smelling loads or potentially infective loads) shall be calculated in conformance with the laws and regulations effective in the country in which such charges or payments arise on the date on which they arise, and they shall be indicated in the consignment note in Swiss francs after the assessed amount in the national currency has been converted in Swiss francs.	-	-

**Notes:**

<sup>1</sup> If transloading of goods (containers) involves warehousing for reasons within the control of the consignor (consignee), the transloading charge is collected once at the tariff rates set forth in points 1.1-1.6 and 1.8-1.9 of this Section and multiplied by the coefficient 1.40.

<sup>2</sup> This charge shall not be collected:

- by carriers of EU member countries save the carrier that accepts the goods from a non-EU member country, or handing over the goods to a non-EU member country;
- when the goods are carried on railways of Ukraine via the railway ferry crossing Crimea – Caucasus.

<sup>3</sup> Applies to loads the methods of positioning and securing of which is set forth in Annex 3 to SMGS "Technical requirements to the positioning and securing of loads".

<sup>4</sup> For the purposes of calculating demurrage (the charge for delay), an incomplete hour of wagon detention shall count as complete.

If one or more of containers carried in a wagon are unloaded from the wagon and detained separately from it, the charge for the delay of such wagons shall be calculated at tariff rates set forth in points 8.4 – 8.8 of this Section.

In the other cases, the demurrage charge (charge for delay) on a container shall be calculated at tariff rates set forth in point 8.1 or in point 8.2 of this Section.

The chargeable duration of the delay of a wagon or container shall be determined in conformance with the national law governing the transit railway.

<sup>5</sup> The charge shall be collected in cases when the carrier actually supplies the wagon with fuel.

<sup>6</sup> In carriage of containers, the rate per container shall be calculated by dividing the per-wagon rate by the number of containers in the wagon.

<sup>7</sup> The charge shall also be collected for rolling on/off of rolling stock carried as load on own wheels under paragraph 12 of this Tariff.

<sup>8</sup> In carriage of containers, the charge is assessed for each container at a rate that is determined by dividing the charge rate per wagon by the number of containers in the wagon.

<sup>9</sup> The collection of the charge shall follow the procedure set by the national law governing the transit railway.
